The diagram illustrates a 111-type crystal face. On the left, a unit cell is shown with its three axes labeled 1, 2, and 3. The 111 face is highlighted in red. To the right, a large array of atoms is shown, representing the crystal face. The atoms are arranged in a hexagonal pattern, with the top layer of atoms being the 111 face. The atoms are represented by small circles, with some colored red to indicate they are part of the 111 face.
