

Google Keep

Google Keep is an app that allows users to have their “to do” lists with them anywhere they go. If you install this app on your Chromebook and your personal device your school agenda is with you all the time. If you record your homework using Google Keep it will show up on any device that you are logged into with your RH account. You can even share agendas with other users, like family members.

This year we are not using paper agendas and use Google Keep. We hope that this becomes a better way to stay organized. However, just like the old agenda, it is only effective if the user records assignments, looks at what they have to do, and then actually does the work. :)
