6,7,1,2,3,4,5	K.CC.1 Count to 100 by ones and by tens.
6,7,5	K.CC.2 Count forward beginning from a given number within the known sequence (instead of having to begin at 1).
6,1,2,3,4	K.CC.3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).
6,7,1,2,3,4,5	K.CC.4.a When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.
6,7,1,2,3,4,5	K.CC.4.b Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.
6,7,1,2,3,4,5	K.CC.4.c Understand that each successive number name refers to a quantity that is one larger.
6,7,1,2,3,4,5	K.CC.5 Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1-20, count out that many objects.
6,7,2,3,4,5	K.CC.6 Identify whether the number of objects in one group is greater than, less than, or equal to the number of objects in another group, e.g., by using matching and counting strategies. (<i>Include groups with up to ten objects.</i>)
6,7,4	K.OA.1 Represent addition and subtraction with objects, fingers, mental images, drawings, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations. (<i>Drawings need not show details, but should show the mathematics in the problem. (This applies wherever drawings are mentioned in the Standards.)</i>)
6,4	K.OA.2 Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.
6,4	K.OA.3 Decompose numbers less than or equal to 10 into pairs in more than one way, e.g., by using objects or drawings, and record each decomposition by a drawing or equation (e.g., $5 = 2 + 3$ and $5 = 4 + 1$).
6	K.OA.4 For any number from 1 to 9, find the number that makes 10 when added to the given number, e.g., by using objects or drawings, and record the answer with a drawing or equation.
6	K.OA.5 Fluently add and subtract within 5.
6	K.NBT.1 Compose and decompose numbers from 11 to 19 into ten ones and some further ones, e.g., by using objects or drawings, and record each composition or decomposition by a drawing or equation (e.g., $18 = 10 + 8$); understand that these numbers are composed of ten ones and one, two, three, four, five, six, seven, eight, or nine ones.
6,4	K.MD.1 Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.
6,7,1,2,3,4,5	K.MD.3 Classify objects into given categories; count the numbers of objects in each category and sort the categories by count.
