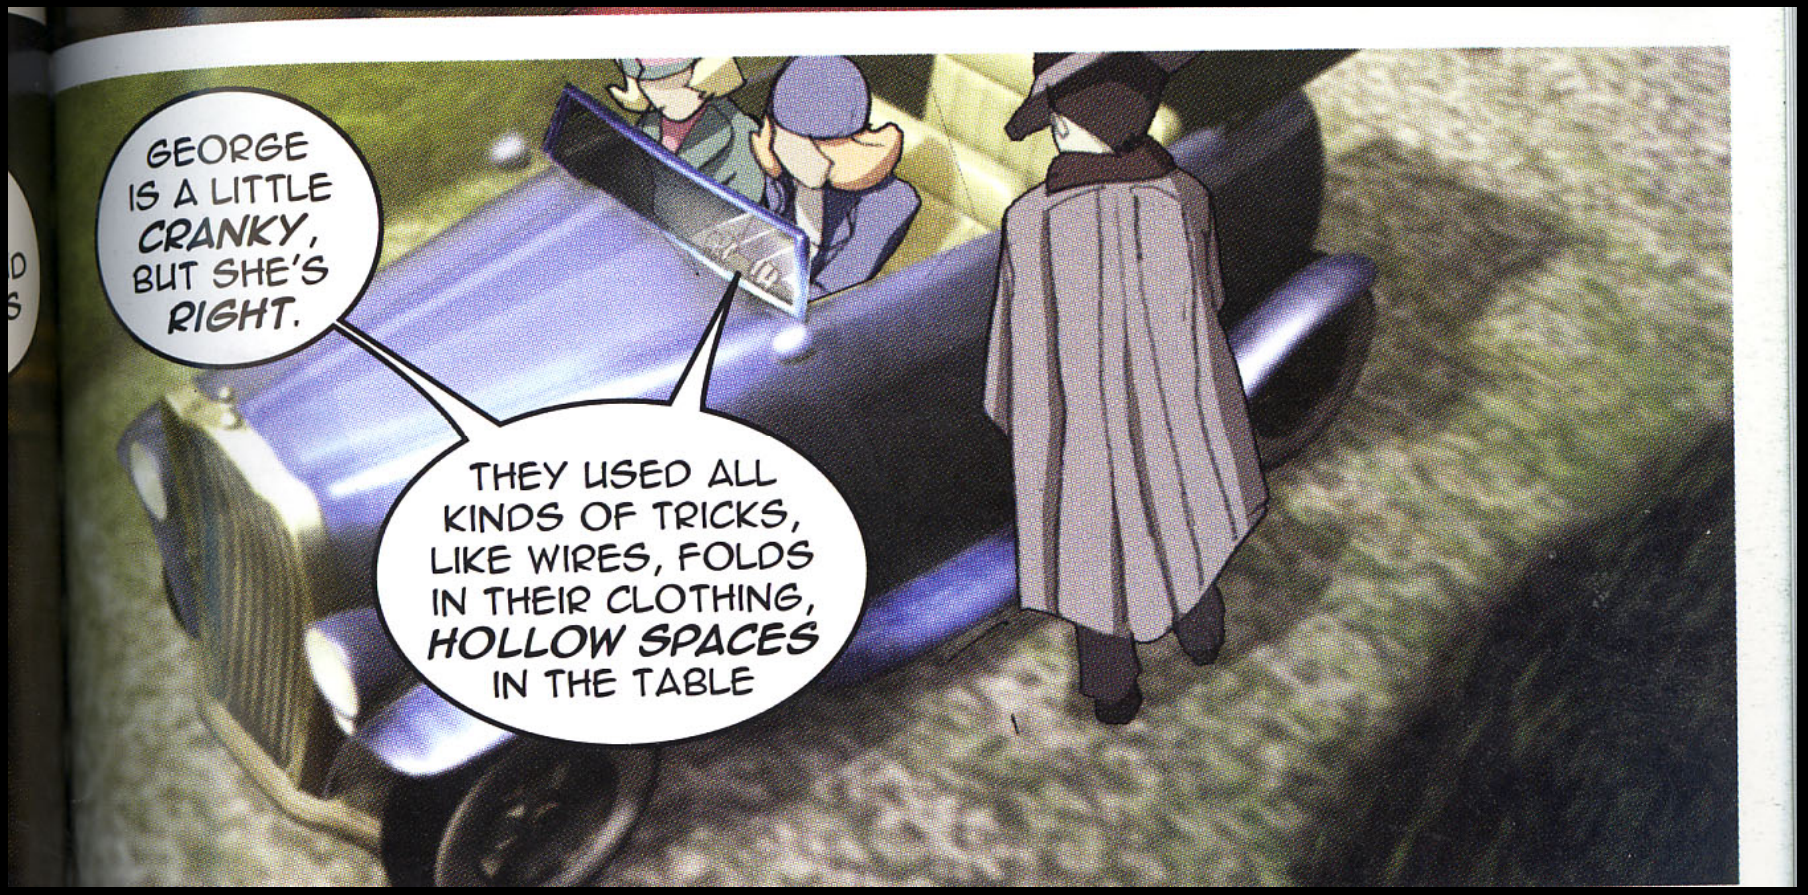
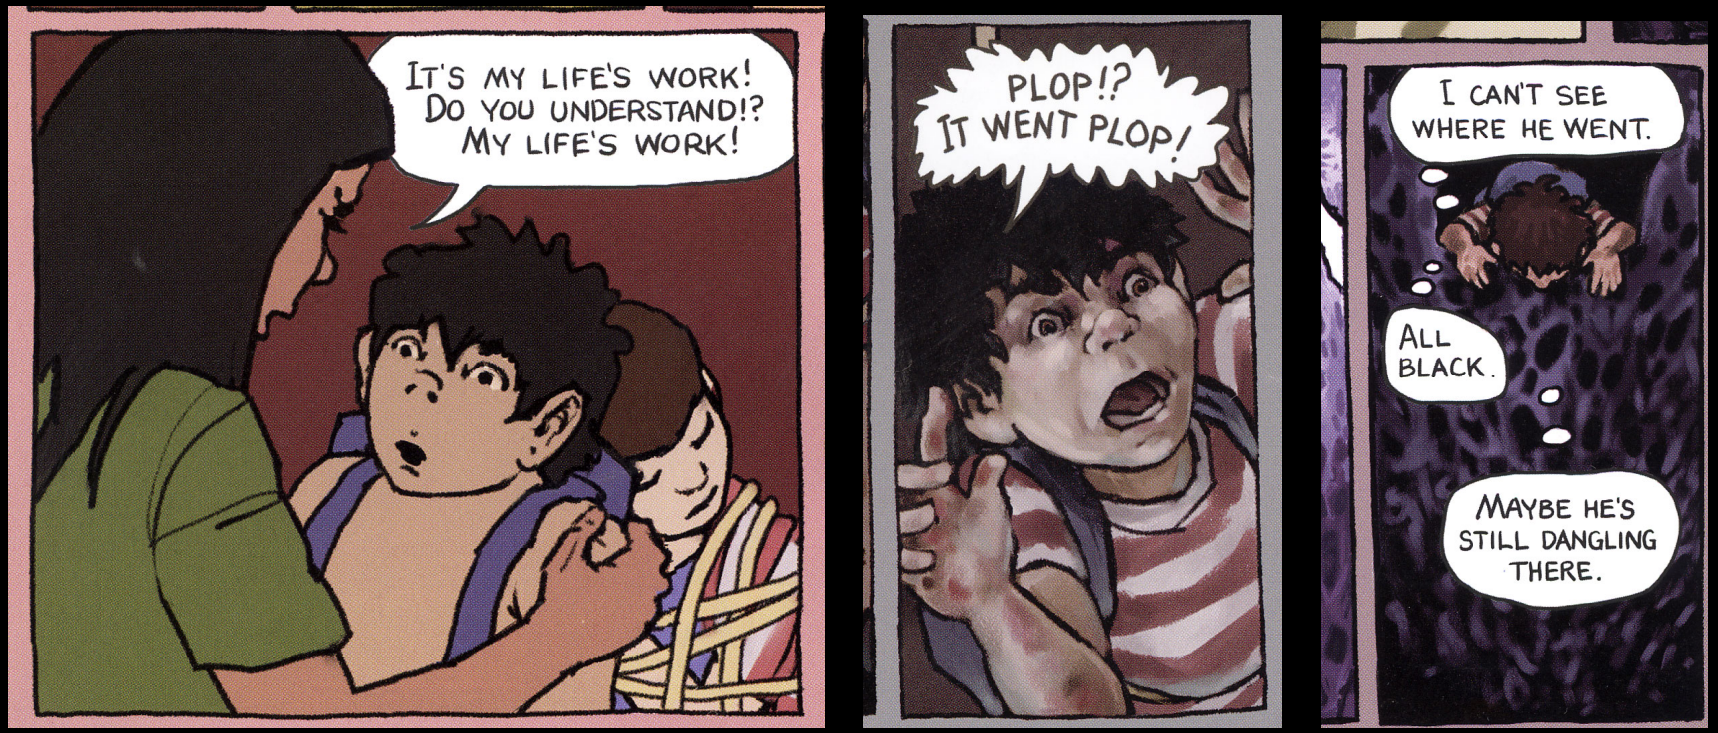
GEORGE IS A LITTLE CRANKY, BUT SHE'S RIGHT.
THEY USED ALL KINDS OF TRICKS, LIKE WIRES, FOLDS IN THEIR CLOTHING, HOLLOW SPACES IN THE TABLE

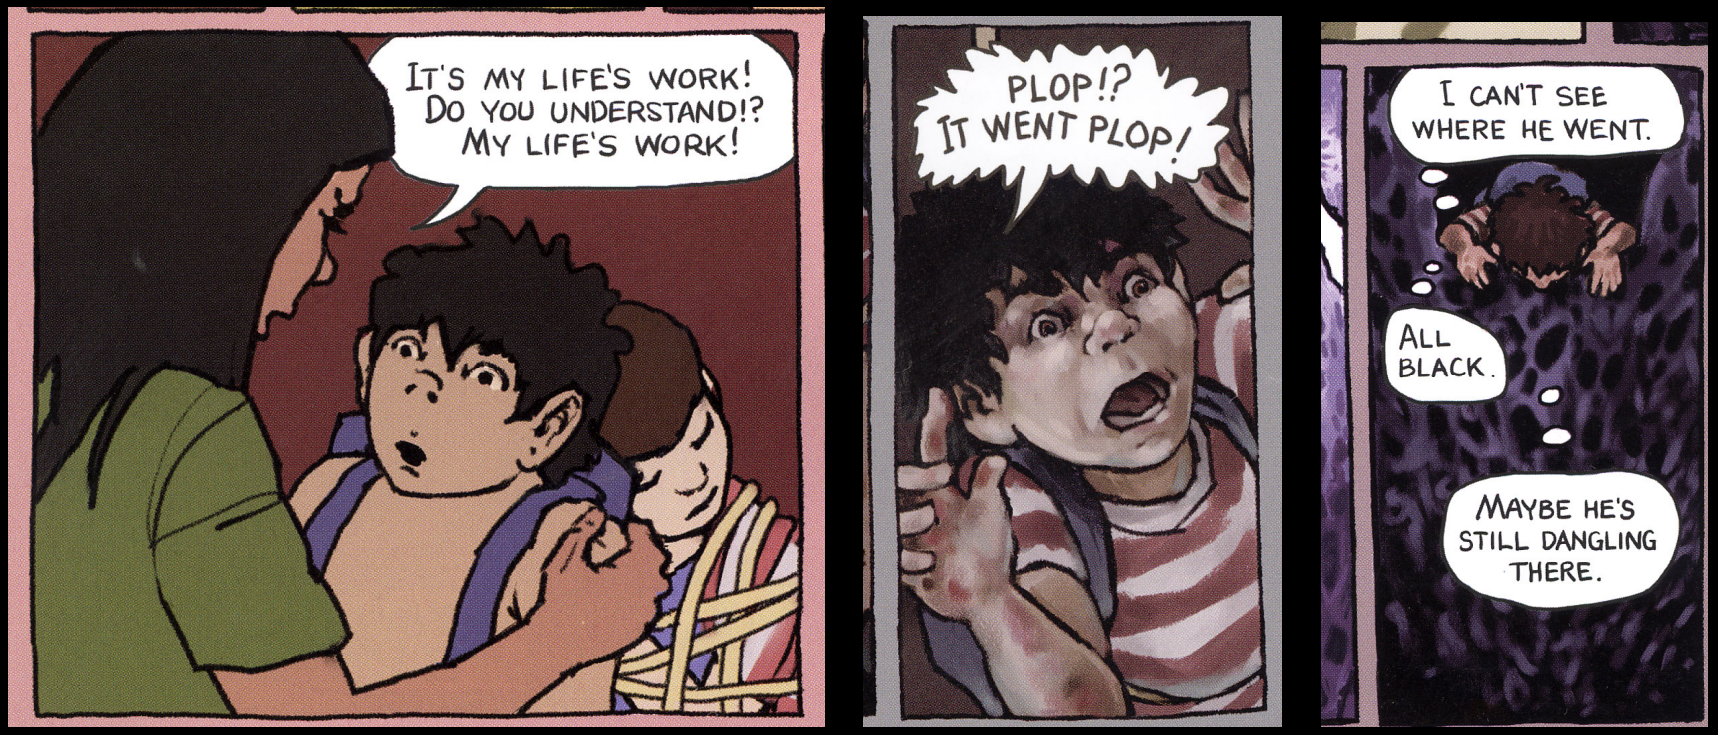
# Graphic novels have black contour lines and color.



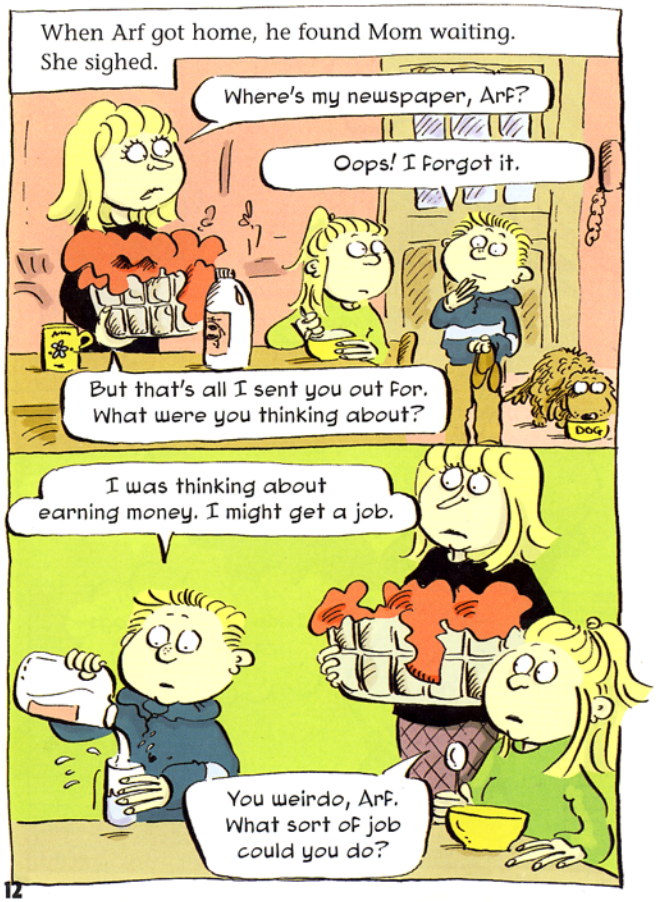


IT'S MY LIFE'S WORK!
DO YOU UNDERSTAND!?
MY LIFE'S WORK!
PLOP!?
IT WENT PLOP!
I CAN'T SEE WHERE HE WENT.
ALL BLACK.
MAYBE HE'S STILL DANGLING THERE.

# Graphic novels have word balloons.

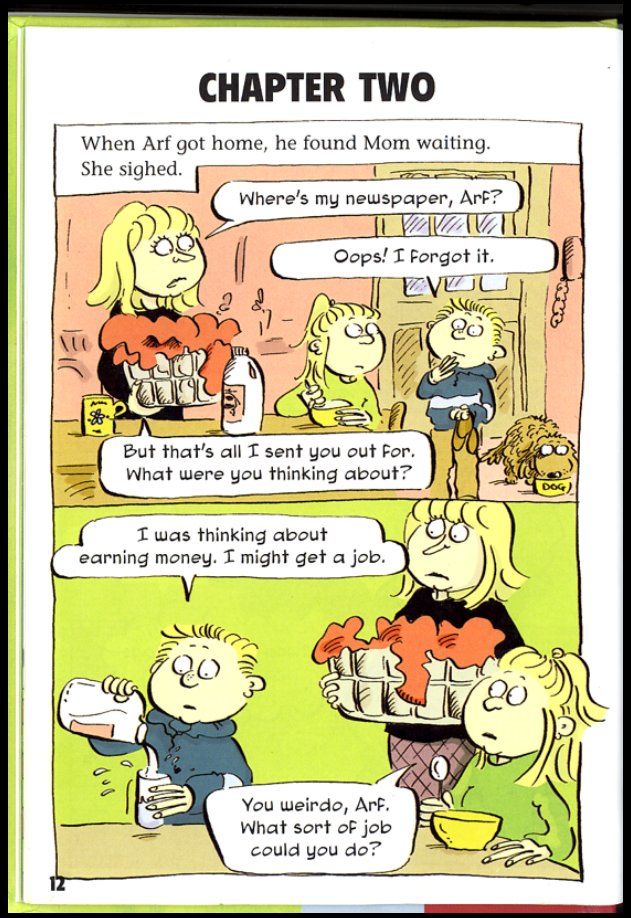


# CHAPTER TWO



When Arf got home, he found Mom waiting. She sighed.
Where's my newspaper, Arf?
Oops! I forgot it.
But that's all I sent you out for. What were you thinking about?
DOG
I was thinking about earning money. I might get a job.
You weirdo, Arf. What sort of job could you do?

# Graphic novels have chapters.



the army is useless!
USA
The people deserve it
Yeah they deserve it

# thumbs-up or thumbs down.

"Stand next to Mom and Max," says Dad. He takes a picture of us making *McDonald Mania* T-shirts.

"Mal, you should get your camera out later," says Dad. "Take some pictures."

"I will," I tell Dad. Hopefully, later, there will be some things I want to photograph, and hopefully, these things won't have anything to do with Frank and Colleen getting married and the Winstons and the Martins becoming one big happy family. So far, it seems like everything has been about that.

When we're done with our T-shirts, everyone slips theirs on, and Dad takes more pictures.

"Who's ready for a swim and then ice cream sundaes?" asks Frank.

Everyone says that sounds great, and I think it does too. But I can't help

wondering: Is there going to be an official Winston family swimming stroke and an official Winston family ice cream sundae?

As we walk back to the pool, I try not to think about that, and instead, I think about the rest of the cruise.

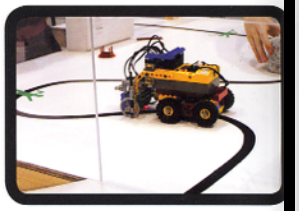
## Senses

How does a robot sense the world around it? Most robots can "see" and "hear," and robots usually need a sense of touch. Very few robots have a sense of taste or of smell.



Some robots uses light sensors to follow a visible trail.

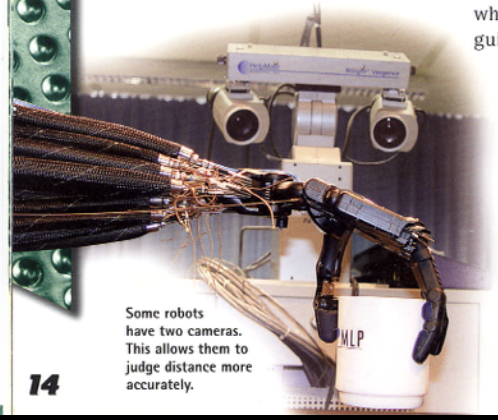
### Sense of sight

Robot sight is quite different from human sight. Humans automatically recognize hundreds of items, such as chairs and tables. But for a robot, the world is a blur of colors and shapes.

Robots can be programmed to recognize certain objects. But the robot will not recognize anything that is new, or out of place.

### Camera eyes

Many robots do not actually see. Their "eyes" are video cameras that send information back to a human controller. The controller watches where the robot is going and guides it.



Some robots have two cameras. This allows them to judge distance more accurately.

**ROBOFACT**

**FOLLOWING THE LIGHT**

Many robots are fitted with **light sensors**. They can follow a line that is darker than the surrounding area, even though they can't actually see where they're going.

### Sense of hearing

Robots detect sound in different ways. Some robots use **ultrasonic sensors** to detect objects. Others can "hear" a human voice. Advanced robots can understand human words and reply.

The small robots called SwarmBot cooperate in a swarm, like a group of ants. They detect each other using sound sensors.

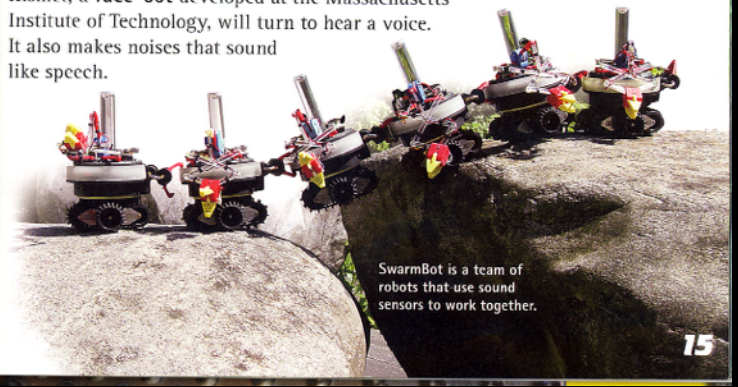
### Sonar

Bats and dolphins use **sonar** to find their way around. They send out high-pitched squeaks or clicks, and listen as the sound echoes back to them.

Many robots also use sonar like this. If the sound bounces back quickly, the robot knows there is something in the way. It can turn to avoid the obstacle.

### Making conversation

There are no robots yet that are advanced enough to have a conversation with a human. However, some can react to a voice. Kismet, a **face-bot** developed at the Massachusetts Institute of Technology, will turn to hear a voice. It also makes noises that sound like speech.



SwarmBot is a team of robots that use sound sensors to work together.

KEEP THE WATER CLEAN!!!
It's a nice hot day in Coney Island. Tea and Carrie catch some rays at the beach.
This is a lovely day, right Carrie?
Yup!
Hm?
TEA?!
GRR

Ready?
Yeah.
Hey, Carrie! Look at this!
What is it, Tea?
Huh?
GRR
clerk!!
HEY!!

Who cares? Let's get outta here!
Who's that? A bodyguard?
Oh shut it!
It's none of your business!
LET'S GO!!
Boom!
EEP!
Say, what do you think you're doing?
Hmph! PUNKS!
U
Are you crazy?
The Next Day...
I'VE GOT IT!!
Let's have a party with fancy-schmancy snacks!
Good idea.

So they put up flyers and passed them out to people too. They couldn't wait till the day came...
Support our cause?
Sure.
PARTY DAY
Anti-Pollution PARTY
SUPPORT THE CAUSE!!
WOW!!
This is gonna be sweet!
Yup!
Eh?
We're sorry about the few days back. We learned our lesson now and yesterday when a few animals passed us by at the park, we thanked them.
What do you want?
Well, it's good you two learned your lesson. Enjoy the party!
THANKS!!
So the boys learned their lesson and they continued to have fun at the RIGHT WAY at the party.

**Main Character ONLY:**

Human? Animal? Creature?

cat

Personality traits?

Caring, fun

Special traits?

Yarn throwing, smell, jumping

Age? Origin (where you are from)?

3 yrs., Rochester

Height? Weight?

2 ft, 8.5 pounds

Occupation (job)?

Super Kitty

Likes, dislikes?

Eating, dancing, helping people
Carelessness, appathy

**Draw** and add the details:
hair, clothing, style, accessories, props, etc…
