Geometry

## Due Friday March 30th

There is a geometry theorem that states:
The median of a trapezoid is parallel to the bases and equal to one-half their sum.
Problem: In the accompanying figure, $\overline{M N}$ is a median of trapezoid $A B C D$. If the area of trapezoid $A B C D$ is 272 in $^{2}$,

- find $x$,
- find the height of trapezoid $A B C D$,
- and find the length of the median.
(A response with little or no work shown will receive NO credit)
