## Multiple Choice

Identify the letter of the choice that best completes the statement or answers the question.(2 pts each)
$\qquad$ 1. Intersecting lines $a$ and $b$ are in plane $R$. Line $m$ is perpendicular to both lines $a$ and $b$. Line $m$ also satisfies which of the following conditions?
a. Line $m$ is parallel to lines $a$ and $b$.
b. Line $m$ is skew to lines $a$ and $b$.
c. Line $m$ is perpendicular to plane $R$
d. Line $m$ is parallel to plane $R$.
$\qquad$ 2. Point E is on line $a$. How many planes are perpendicular to line a through point E ?
a. none
b. 1
c. 2
d. infinite
$\qquad$ 3. Plane $J$ and $K$ are each perpendicular to $\overleftrightarrow{S W}$. Planes $J$ and $K$ must be
a. intersecting
b. parallel
c. perpendicular
d. skew
$\qquad$ 4. Two parallel planes $E$ and $F$ are intersected by plane $G$. What figure is formed by the intersection?
a. one parallel plane and one line
b. one parallel line and two intersecting lines
c. two parallel planes and one line
d. two parallel lines

## Short Answer

Please solve each problem in the section showing all work for partial credit.
5. Based on the pattern, what are the next two terms of the sequence?
$2,-4,8,-16,32, \ldots$
6. Name the ray in the figure.

7. If $\mathrm{EF}=2 y+3, \mathrm{FG}=4 y-3$, and $\mathrm{EG}=36$, find the values of $y$, and $E F$. The drawing is not to scale.

8. Write the intersection of plane $U V Y Z$ and plane $S V W Z$ ?

b) Is the intersection of plane $U V Y Z$ and plane $S V W Z$ parallel to $\overline{T X}$ ? Justify your answer.
9. Name the four labeled segments that are skew to $\overline{C G}$

$\qquad$
$\qquad$
$\qquad$
$\qquad$

Are any of the lines you chose perpendicular to $\overline{C G}$ ? Explain why or why not.
10. M is the midpoint of $\overline{A B}$. The coordinates of A are $(-3,6)$ and the coordinates of M are $(1,2)$. What are the coordinates of B?
11. If $m \angle A O C=7 x-2, m \angle A O B=2 x+8$, and $m \angle B O C=3 x+14$ solve for $x$ and find $m \angle B O C$.

12. a. Graph $\triangle \mathrm{ABC}$ with vertices $A(-2,9), B(7,-3)$, and $C(-2,-3)$.
b. Find the perimeter of $\triangle \mathrm{ABC}$.

13. Explain the similarities and differences between a linear pair of angles and supplementary angles.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
14. What are three names for the angle?

$\qquad$
$\qquad$
$\qquad$
15. The Rush Henrietta wrestling team has a match at Marcus Whitman. The NGA is at point $(3,5)$ and Marcus Whitman is at point $(7,-9)$.
a) The map shows a rest stop halfway between the schools. What are the coordinates of the rest stop?
b) If the distance is measured in miles, how far is it from the NGA to Marcus Whitman?

16. Draw a picture of the following situation and answer the question.
$\overleftrightarrow{C G}$ is perpendicular to plane X at point $\mathrm{G} . \overleftrightarrow{\mathrm{DE}}$ is perpendicular to plane X at point E . What is the relationship between $\overleftrightarrow{C G}$ and $\overleftrightarrow{D E}$.
17. Given $\overrightarrow{A O C}, \overrightarrow{B O D}$ and $\overrightarrow{O E} \perp \overrightarrow{A O C}$.

If $m \angle A O B=3 x+5$ and $m \angle D O C=5 x-15$ find:

18. Points $L, M$, and $N$ are collinear with $M$ in between $L$ and $N . \overline{L M}=2 x+8$ and $\overline{M N}$ is one half the length of $\overline{L M}$. If $\overline{L N}=42$, write and solve an equation to find $x$.
