

7: Estimating Sums and Differences

Round each to the nearest hundred and then add

$345 + 783$ is approximately _____

Round each to the nearest ten and then subtract

$62 - 17$ is approximately _____

Round each to the nearest hundred and then subtract

$1462 - 285$ is approximately _____

Round each to the nearest ten and then add

$489 + 628$ is approximately _____

7: Estimating Sums and Differences

Round each to the nearest hundred and then add

$345 + 783$ is approximately 1100
 $300 + 800$

Round each to the nearest ten and then subtract

$62 - 17$ is approximately 40
 $60 - 20$

Round each to the nearest hundred and then subtract

$1462 - 285$ is approximately 1200
 $1500 - 300$

Round each to the nearest ten and then add

$489 + 628$ is approximately 11200
 $490 + 630$
