What's Great in B-8?

Reading

We read maya's decline and fall and central idea. We read that the scientist found blue paint from thousand year ago and that article central idea. I read the boy who talked with animal and it about a fisherman caught a big turtle and other people want to buy the turtle and the kid went over and said" plz release the turtle and they said"no". His dad say i will buy it and they said fine we will release it. Two day later the kid is gone and found the kid riding the turtle from 100 miles away. 1 year later they still could not find the kid and they said"maybe he will come back his own. I read a book at home and the book is called plant vs zombie the ending is very very very very fantastic. Plant lost but there still a boy in there team and the boy beat so many zombie with silly tricks.

Writing

We wrote notes maya and outline and wrote our body paragraph. We wrote central idea and detail about the blueprint in the outside circle of the middle circle.

Math

We did a review how to solve multiply using algorithm. Also rounding and estimate math problem. We did converting decimal division into whole numbers division using mental math. And did some question about even and odd. I also did ixl.

Science/Social Studies

We learn new word about egypt. We also play a game and answer the question
